SUMMARY

Senior Product Designer with 4 years of experience designing end-to-end product experiences for SaaS platforms, enterprise software, and B2B applications. Proven track record delivering user-centered design (UCD) solutions across Accounts Payable (AP) automation, Order to Cash (OTC), and payments modules. Deep expertise in UX research, interaction design, information architecture, wireframing, prototyping, and usability testing. Skilled in cross-functional collaboration with product managers, engineers, and stakeholders to ship high-quality, data-informed design solutions. Proficient in Figma, Adobe XD, Framer, design systems and creative AI tools for design and content. Passionate about building scalable design systems and accessible, intuitive interfaces that drive measurable user engagement.

EXPERIENCE

Product Designer | Cheggout Services Pvt Ltd. May 2026 - Oct 2026

Bangalore, Karnataka, India

- Worked on creating a new brand design system to be used across Product and communication organization wide
- Designed a new platform for the internal Ops team helping them create offers and run campaigns for different brand across different channels in form on Banners, Instant rewards, Deals, etc
- Crafted a new direction for the company's identity on the social networking platforms such as LinkedIn
- Created ad banners and CTAs for brands to improve and increase the CTR for the offer being shown to the user
- Designed a new scratch card flow to increase click rate for redeeming the offer being shown. The scratch card was also redesigned to reduce the cognitive load and maintain a minimalistic layout
- Designed a new offer redemption journey in the form of a mystery box; implemented in-app for many banking apps
- Templatised presentation guidelines for organization's internal meetings and pitch decks

Senior Product Designer | Hyperbots Inc. November 2023 – January 2026

Bangalore, Karnataka, India

- Led end-to-end product design for a SaaS-based Accounts Payable (AP) automation platform targeting the mid-market segment in the USA, resulting in a launch-ready Minimum Viable Product (MVP).
- Designed and shipped a Payments Module streamlining invoice processing and payment workflows, reducing task completion time and improving user satisfaction scores through iterative usability testing.
- Architected the Collections Module for an Order to Cash (OTC) SaaS platform, applying user research, journey mapping, and information architecture principles to simplify complex financial operations for end users.
- Conducted UX research including user interviews, competitive analysis, and heuristic evaluations to identify pain points and inform data-driven design decisions across the product roadmap.
- Built and maintained a scalable component library and design system in Figma, enabling consistent UI patterns and accelerating developer handoff across engineering teams.
- Collaborated cross-functionally with product managers, engineers, and C-suite stakeholders to align design strategy with business objectives and user needs through structured design reviews.
- Crafted brand identity assets including the company mascot and social media content, strengthening brand consistency and user engagement across marketing channels.
- Initiated and led the PeopleX internal culture program, improving employee satisfaction through structured engagement initiatives.

Product Designer | Skillmatics (Grasper Global) January 2023 – July 2023

Mumbai, Maharashtra, India

- Designed play experiences for children aged 6–10 on educational product lines, applying user research and age-appropriate interaction design principles to increase engagement and learning outcomes.

- Created high-fidelity illustrations for card and board games, contributing to product visual language and driving consumer appeal on retail shelves.
- Utilized 3D modeling and rendering (Fusion 360, Keyshot) to prototype and validate new toy product concepts before physical production.

Product Designer & Game Designer | Binca Inc. February 2022 – July 2022

Bangalore, Karnataka, India

- Designed and delivered a phonics-based educational game for children aged 2–6 as the graduation internship project, integrating physical activity with digital learning to create an inclusive play experience.
- Supported development of educational games now stocked at Hamleys, focusing on user experience (UX) design, educational value, and intuitive interaction patterns.

EDUCATION

Bachelor of Design (B.Des) – Product Design | MIT Institute of Design, Pune 2018 – 2022

Pune, Maharashtra, India

Higher Secondary Education (12th Grade) | Zydus School for Excellence 2016 – 2018

Ahmedabad, Gujarat, India
